

FINDING IT ON THE NET

Avionics Manufacturers

BY WALTER SHAWLEE 2

In this month's "Finding it on the Net," we're providing a quick avionics manufacturer's index. Sometimes, you just need to go to an avionics maker's website for a quick look at system information, product specs, appearance, install data or other information.

Here is an index of manufacturers you might need to locate. Keep in mind, there have been many consolidations in this industry, so we have added previous or related company data, where applicable. Manufacturers Bendix and King Radio are now part of Bendix/King by Honeywell.

Space does not permit including every manufacturer on Earth on one page, nor facilities primarily devoted to military, government, instrument overhaul or engine instruments.

Hopefully, however, this listing provides a few pointers you didn't have before and a quick way to locate a wide range of avionics product information.
