Avionics Professionals to Connect in Reno, Oct. 5-6 Hotel reservations due Sept. 16

The AEA Connect Conferences are where aviation's technology experts gather for technical training from leading avionics, instrument and test equipment manufacturers. These two-day events allow technicians and business owners the opportunity to learn industry best practices; connect with regional sales and product support representatives; satisfy training requirements; see the latest products and services; and receive important updates on the most current regulatory news affecting their business.

The AEA West Connect Conference is set for Oct. 5-6, at the Grand Sierra Resort in Reno, Nevada. Advance registration is open for both attendees and exhibitors. The deadline to make a hotel reservation in the AEA room block is Sept. 16. [More...](#)

AirQuest Continues Steady Growth

During the last 15 years, AirQuest Aviation has steadily grown its aircraft services, from FBO line service to aircraft maintenance, avionics, acquisition and management to flight training and charter. It operates two 15,000-square-foot facilities 30 miles apart just north of Pittsburgh, Pennsylvania. Since last year, AirQuest Aviation has been working to expand again – this time focusing on its avionics capabilities.

"At our maintenance facilities at Pittsburgh-Butler Regional Airport and Beaver County Airport, we maintain and repair aircraft from Cirrus up to smaller jets like Citations and Beechjets," said Brian Thoma, avionics technician and an airframe and powerplant mechanic. "On the avionics side, we service single-engine and twin-engine piston aircraft. It's our bread and butter. As for customers, we serve both individual owner-operators and businesses with the majority being corporate and charter operators." [More...](#)

New banner materials and changes to URLs may be made monthly if received by the first day of the month. Positioning of banner advertisements is at the sole discretion of the editor. The lead banner will appear first. Other advertisements will generally be placed in order based upon frequency and size considerations.
